

► Course Overview

This course provides a structured and practical approach to recognising and responding to indicators of pre-attack or suspicious behaviour within the workplace. Developed and delivered by RedLine Consulting, the program draws upon counter-terrorism, security, and behavioural analysis frameworks to help organisations enhance staff awareness, strengthen protective measures, and reduce exposure to emerging threats.

Participants are introduced to the methods of hostile reconnaissance and the techniques used by those planning criminal or terrorist acts. Through a combination of case studies and scenario-based learning, staff will gain confidence in identifying unusual activity, engaging appropriately, and appropriate reporting.

Workplace Vigilance: Identifying and Responding to Threats

Delivered by RedLine Consulting

► Learning Outcomes

Upon completion, participants will be able to:

- Understand the process and intent behind hostile reconnaissance and pre-attack behaviours.
- Identify behavioural, environmental, and situational indicators of suspicious activity.
- Apply structured observation and communication principles during an incident.
- Confidently engage and de-escalate interactions in line with safety protocols.
- Report, record, and escalate concerns accurately within organisational and external frameworks.

Threats
